FADSS Statement on AP Psychology

Tallahassee, FL – The Florida Department of Education (FDOE) has not banned AP Psychology.

FADSS continues to work diligently with FDOE and school superintendents who want to continue to offer AP Psychology. Superintendents are openly communicating with parents their district’s plans for this course or an alternative college level course as we prepare for the start of the school year.

AP Psychology continues to be listed in Florida’s Course Code Directory and we hope that College Board will keep the best interests of students at the forefront and award college credit to all Florida students who successfully complete the AP Psychology exam.
